Further Exploration Program Updates at Marshall Lake

Burnaby, British Columbia – August 25, 2014- White Tiger Mining Corp. (the “Company” or “White Tiger”) is pleased to provide its first exploration update since May 22, 2013 wherein White Tiger reported its comprehensive review of successful significant drill results to date for its Marshall Lake property. The Marshall Lake property is an advanced exploration stage copper, silver and gold project located 120 km north of Geraldton, Ontario (via a good all weather gravel road from Hwy 11/Trans Canada Hwy, and just 22 km north of the main CNR rail line).

On May 22, 2013 - the Company reported a two – core drill hole program at the “RM Zone. The program was recommended by Caracle Creek International Consultants “Caracle Creek” of Toronto to test their reliability of 3D inversion of Induced Polarization modelled targets within the RM Zone. Both drill holes RM-13-40 and RM-13-41 successfully intersected significant grades and widths of copper, silver and gold. Selected highlights of certain assay results from the Company’s drill programs on the Marshall Lake property (from 2006 to present) for the “RM Zone” (and adjacent zones) are summarized in the following table:

Hole Number	From (metres)	To (metres)	Width (metres)	Copper (Cu) (%)	Silver (Ag) (g/tonne)	Gold (Au) (g/tonne)
RMZ 11-21	149	182	33	1.53	6.8	0.127
RMZ 11-23	269	293	24	1.01	4.0	0.090
RMZ 13-40	144	187	43	1.38	5.4	0.040
GAZ-06-02	3	30	27	2.03	37.9	0.305
GAZ-06-04	2	31	29	1.30	24.7	0.290

Note: a complete summary of assay result highlights is found in the pages on the Company’s website and in previous news releases.

SCOPE OF WORK NOW UNDERWAY AT CARACLE CREEK

- Inversion IP
- Magnetics Inversion
- 3-D modelling and sensitivity testing
- VTEM Inversion
- 2-D modelling and LEI sections
- Interpretation and reporting

White Tiger commissioned Caracle Creek to merge several generations of geophysical source data into a high quality 3-D inversion model to further evaluate the potential of numerous other known mineralized copper showings between the RM Zone of stringer style of copper, silver and gold along the 4km distance east progressing up-section to the Volcanogenic Massive Sulphide “VMS” historical Billiton Deposit of copper, silver, and zinc. The program now underway is expected to be completed in four to six weeks.

The Billiton resource is historical in nature and although the Company believes the work was done to competent high standards of the day and is reported to remain open to both depth and along strike the Company plans to complete a full technical review to NI 43 -101 compliant standards.

This news release has been reviewed and approved by Gordon Gibson, P.Geo., who is acting as the Company’s Qualified Person for the Marshall Lake property project, in accordance with regulations under NI 43-101 standards.

White Tiger Mining Corp.
